Excerpt from Case History in Pediatrics: A Collection of Histories of Actual Patients Selected to Illustrate the Diagnosis, Prognosis and Treatment of the Diseases of Infancy and Childhood, With an Introductory Section on the Normal Development and Physical Examination of Infants and Children Case teaching, which had been in use for a number Of years in the Harvard Law School, was introduced into the Harvard Medical School in 1900 at the suggestion Of Prof. W. B. Cannon, then a student in the school. The author believes that this method Of teaching is far superior to recitations, quizzes, and conferences. One Of its greatest advantages is that it compels the student to think for himself. It is almost as valuable as the clinical lecture, in which the patient is shown, and, except in special instances, is more instructive than the didactic lecture. It is surpassed only by bedside instruction to small groups of students. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
