Excerpt from *Crustacea Caspia, Vol. 1: Contributions to the Knowledge of the Carcinological Fauna of the Caspian Sea; Mysidae* It is thus a very considerable bulk of Caspian Crustacea that will lie before me, and I hope that a careful investigation of this vast. Material will prove to be of considerable interest, both in systematic and biological respects, and that several fundamental conclusions relating to the early history of the Caspian Sea may be hence derived. I think, however, it may be convenient to delay such a general discussion until the completion of the systematic investigation of the several groups. On this occasion I only wish quite briefly to indicate the general suggestions to which a preliminary examination of the specimens has led me, and which I hope subsequently to be enabled to support by more reliable facts.
